Terms and Conditions of Sale

TERMS:

We accept Company Check, Cash, VISA, MasterCard, Discover and American Express for your product payment. Any checks that are returned to J & F Commercial Products, for what ever reason, the issuing party will be charged a \$25.00 fee.

NET 30 AFTER CREDIT APPROVAL:

The net amount of the invoice is payable within 30 days following date of invoice. Delinquent accounts are subject to a service charge of 1-1/2 % per month on the unpaid balance until paid. If it becomes necessary to file suit for collection of account, all costs shall be paid by the buyer.

WARRANTY:

All statements, technical information and recommendations about our supplied products are based upon tests believed to be reliable but do not constitute a guarantee or warranty. All products are sold with the understanding that the purchaser has independently determined the suitability of such products for its own purpose.

PRODUCT RETURN POLICY:

A return authorization is required by J & F Commercial Products before any credit is given on all material. There will be a restocking fee of 20% of the product being returned. No returns will be granted on material after 14 days of receipt, or on specially order products or services. Any material being returned, must be in good conditions for resale.

DELIVERY POLICY:

J & F Commercial Products has a regional delivery service on specified days. All orders exceeding \$100.00 will be delivered free of charge. Orders below \$100.00 are subject to a \$5.00 service fee. At no time can a delivery be guaranteed at any specific time of the day.

CUTTING POLICY:

J & F Commercial Products has capabilities of cutting material. Material is subject to cutting fee according to the desired cutting.

- 144" Overhead Table Saw
- 96" Hydraulic Shear
- 80" x 150" Multicam CNC Router Table

CHANGEABLE LETTER SYSTEMS

Flex Change & Wagner Zip Change

Changeable Letter Systems

Flex Change Letter System

Flexible changeable letters are printed letters on thin flexible 30 mil plastic. Includes an assorted variety of letters, numbers, and punctuation. Set provides more of the vowels and primary consonants than the lesser used alphabet. The letter fits into the grooved tracking, please double check your letter imprint, plastic height, and thickness. Individual letters are not sold separately, kits only.

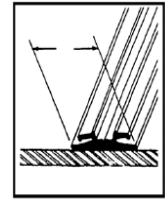

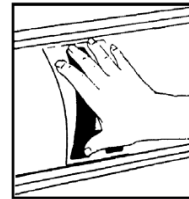

Letter Kits

FRAMES, POSTS AND POST & PANEL SYSTEMS

U-Channel and Square Posts

U-Channel and Square Posts

U-Channel Posts

Made of our tough new billet steel, RIB-BAK® is the strongest U-channel post available, especially in the crucial load bearing points, with over 25% greater tensile strength than our competitor's rail steel. Its patented ribbed-back design withstands higher wind loads and saves money by supporting a lot more sign per post. Its contact points are flush surfaces, providing solid, more permanent sign attachment. And installation typically takes just minutes, with posts easily driven with conventional tools.

Sign Supply Source Components

Sign Supply Source Components

Hinge Handles

HingeHandles are a revolutionary type of hinge designed specifically for A-frame signs. Super-strong, quick to install, and very inexpensive, Hinge Handles make A-frame signs easier to carry and twice as functional—all four sides can be used for signage.

Size	Price
12"	7.80 includes tee nuts & screws
16"	9.60 includes tee nuts & screws

SignFeet

Sign Feet are high-strength flexible polyethelene-injected parts that improve Sign Boards—and any kind of A-frame sign—in several ways

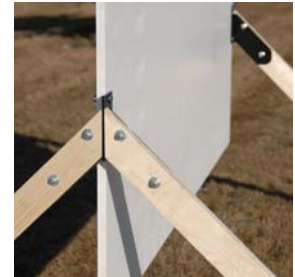

Price
3.00 (4 per package w/rope)

Sign Brackets

Sign Brackets allow signmakers to quickly and easily install large outdoor signs—without having to dig holes or construct heavy, complex support systems. With Sign Brackets, you can fasten four pre-cut 2-by-4s to a 4-by-8 sign board in just a few minutes. Sign Brackets are made from 3/16" plate steel, and powdered-coated to produce a smooth, durable finish that will last many years, even in harsh conditions.

Price
75.00/set of 2

Sign Link

Sign Link is the perfect solution for installing signs to chain-link fences and channel sign posts. It's a new patent-pending product made of 33% glass-filled nylon with a threaded center insert (in two sizes: 5/16" coarse and 8mm coarse). Sign Link fits all chain-link grid sizes. Sign Links come with life-time warranty.

GOLD LEAF PRODUCTS

Gold Leaf and Sizing

Gold Leaf and Sizing

Manetti 23kt Italian Patent Gold Leaf

Manetti is one of the oldest manufactures of gold and silver leaf in the world. Founded in 1820, it has preserved the ancient craft of gold beating, handed down from generation to generation. Over the years, the historic craftsmanship for which Manetti is famed has been updated by the introduction of modern machinery, without compromising the company's high standards of quality. With 170 years of experience and a large production capacity, Manetti is a key name for quality gold and silver leaf in Italy and worldwide.

ClearJet & ClearShield

ClearJet Solvent-Based UV Liquid Laminate

ClearJet® : clear coating for dye-based inks and water-sensitive ink/media combinations

Use **ClearJet®** on most substrates, including canvas, vinyl (enamel receptive and non-enamel receptive), banners, fiberglass, wood, metal, plastic, and paper. **ClearJet®** is designed for water-based inks and can also be used on solvent-based inks when applying by aerosol or spray applications.

Series FA is made to penetrate the canvas, making the ink/media combination more flexible, not cause discoloration or color shifts and not react with the ink jet receptive layer of most fine art substrates.

Gloss		Semi-Gloss

12oz. Aerosol	9.88	12oz. Aerosol	9.88
Quart	31.49	Quart	31.74
Gallon	94.46	Gallon	95.21

ClearShield Water-Based UV Liquid Laminate

ClearShield® is your first choice for all non-water-sensitive applications. We created **ClearShield®** using state-of-the-art resins and ultraviolet inhibitors that protect the substrate, ink, and the clear coating itself. These non-yellowing clear coatings have excellent exterior durability and are highly flexible.

Use **ClearShield®** on most substrates, including waterproof canvas, vinyl, banners, fiberglass, wood, metal, plastic, and paper. You can apply it over solvent-based inks and most water-based paint systems. **ClearShield®** is available in several versions. This chart gives you information about each product.

MAGNETICS

Die-Cut, Sheeting, RubberSteel

Magnetics

Magnetic Die-Cut Shapes

Meeting your demands

Colorful magnets in a variety of everyday shapes are among today's most popular sales tools.

Standard die-cuts

Our pre-cut flexible magnetic shapes - die-cut on .020" (.51mm) matte white, top-coated vinyl come in six popular profiles: business cards, houses, telephones, photo frames, number ones and delivery vans.

Custom die-cuts

We can also manufacture virtually any shape you specify in thicknesses ranging from .008" to .060". (.20mm to 1.52mm)

Popular custom profiles include hearts, molars and adhesive bandages, plus larger, rectangular die-cuts for calendars and sports schedules. A fee for creating the die is added to all orders. In addition to matte white, color options include red, blue, yellow, green, orange, brown, black, gold and silver.

Please call for price and availability. Samples can be provided upon request.

Magnetic Sheeting

Superior holding power... Magnum® flexible magnetic sheeting is a thermoplastic, permanent magnetic product with high-intensity, multi-pole magnetic arrangement designed to produce superior holding power on most metallic surfaces. We offer standard magnetization on the non-laminated side of the flexible sheeting, and provide custom magnetization upon request.

Wide range of sheeting... Our Flexible magnetic sheeting is available in standard roll lengths of 25', 50', 100', and 200' up to 24 3/8" wide. It is also available in custom roll lengths up to 1800 ft. depending upon width and magnet thickness. Thanks to total automation of our production lines, you can rely on Magnum brand sheeting to lay flat.

PAINT

1 Shot Lettering Enamel

PAINT

1 Shot Lettering Enamel

1 Shot Lettering Enamels are oil based, high gloss enamels for interior and exterior use on metals, wood and glass; and have been the benchmark in lettering enamels for over 50 years. Excellent flow characteristics, single stroke coverage and vibrant durability are just a few of the reasons **1 Shot Lettering Enamels** remain the favorite of pin-strippers and sign painters alike. With their infinite color bleedability and a full line of reducers and hardeners, it's no wonder **1 Shot Lettering Enamels** are used by more sign and graphics professionals, than any other brand.

PAINT

Chromatic Bulletin Colors

Chromatic Bulletin Colors are low VOC, fast drying, high gloss enamels that, due to their color clarity and superior durability, remain the industry standard for exterior sign and billboard painting. Fast drying times allow for fast cut in, and when time is money, **Chromatic Bulletin Color Enamels** are your best investment. Excellent adhesion, coverage and flow characteristics also make **Chromatic Bulletin Colors** perfect for use as above-water line marine and high gloss industrial applications.

SHEET PRODUCTS

Extira

Extira

Extira is a panel product that resists moisture, rot and termites and offers excellent performance in exterior environments. Extira can be used in any non-structural paint-grade EXTERIOR application. It also works well for high moisture interior environments. Extira has a 5-year limited warranty, unprecedented in its product category.

The Revolutionary TEC™ Manufacturing Process

Wood fibers + phenolic resins + zinc borate are combined to form a mat. The mat is bonded in a sealed press, using hot platens and steam injection. This controlled environment has an accelerated heat transfer, like some microwave or convection ovens.

Wood + Phenolic Resin + Zinc Borate

Sealed Press, Hot Platens, Steam

! PHENOLIC RESIN
Moisture & Temperature
Resistant!

VS

Wood + Urea Formaldehyde Resin

Hot Platens

The Manufacture of MDF

Wood fibers + resins (typically urea formaldehyde resins) are combined to form a mat. The mat is bonded in an open press, using hot platens, much like a waffle iron. Heat is pressed (transferred) into the board from the exterior surfaces, therefore often "overcooking" the exterior surfaces and leading to an uneven density profile.

Plywood

Medium Density Overlay (MDO)

Medium density paper overlay on top of exterior fir plywood for sign painting, or exterior construction, has a nice paintable surface. This two-step process includes the plywood substrate being sanded before M.D.O. overlay is applied to minimize wood grain and patch show-through. This is our standard grade of M.D.O.

Primed, Good two sides

Size→ Thickness↓	48" x 96"	48" x 120"	60" x 120"
1/2"	58.50	104.10	127.43

Unprimed, Good two sides

Size→ Thickness↓	48" x 96"	48" x 120"	60" x 120"
1/2"	54.54	91.41	124.28
3/4"	70.70	114.09	162.60

Omega SignBoard

Hardwood Core, Vinyl Surfaces

Omega SignBoard's hardwood plywood core is lighter and stronger than MDO. Unlike traditional MDO products, the vinyl surface does not require time consuming and costly painting, is smooth and uniform, and will not flake or peel like a painted surface. Omega SignBoard's vinyl surface is almost "self-cleaning," resisting dirt and the construction makes it easy to fabricate with standard wood cutting tools.

White ONLY

Size→ Thickness↓	48" x 96"

Metal Faced Panels

D-Lite

An economical alternative to Dibond, sheet metal or expanded PVC. Only 3mm thick yet strong and lightweight. The core is a high density, corrugated polyallomer (CPA), that will not swell, wick water, corrode, rot, or delaminate – making it perfect for all outdoor or UV-exposed indoor applications.

White

Size→	48" x 96"	48" x 120"
Thickness↓		
3mm 1sided	82.05	102.77
3mm 2 sided	88.15	

*D-Lite is not a stocked product , must be special ordered.

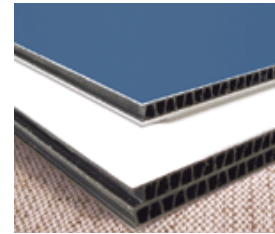

Econolite

An economical sign panel with one painted aluminum side. The other side is a light gauge, aluminum backer. When properly supported on 24" centers, Econolite can be used for post and panel and/or billboard applications. See our Applications section for more information.

White

Size→	48" x 96"	48" x 120"

6mm	90.44	122.95
10mm	136.73	

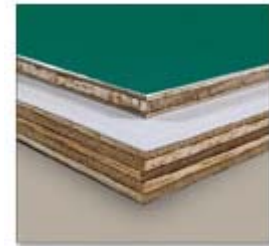

Lusterboard

1/4" LusterBoard is half the weight of 1/2" MDO, yet 85% as rigid, making it easier to install and handle. 1/2" LusterBoard has strength similar to 3/4" MDO but weighs much less. The colorfast surface means you can change copy again and again with little or no ghosting. LusterBoard's hardwood core is a premium grade, rigid, exterior furniture-grade plywood with smooth, tight, sanded veneers for optimum surface beauty.

Floor Guard

Floor Guard is a premium non-slip, heat-activated (200° F) over-laminating film with an aggressive solvent acrylic adhesive specifically designed for the creation of interior floor graphics. It offers a non-reflective textured finish that affords clear viewing while also providing a durable, scuff-resistant, waxable surface. It meets international standards for slip resistance. Constructed from 5 mil PVC, Floor Guard also doubles as an excellent pop-up display over-laminate for trade-show graphics. The texture finish hides and masks finger prints and resists scuffing from rigorous handling of panels.

FDC 2612– AT60 Matte Clear Finish

A matte finish polypropylene with excellent clarity, abrasion resistance and lay flat characteristics. This product is manufactured with an acrylic adhesive designed for clean pick-up and transfer performance on all brands of cast or calandered vinyl. The stable adhesive will not build in tack level when applied to vinyl graphics for extended periods of storage

Length→	100 yds
Width↓	
Less then 48"	2.55 per inch
More then 48"	2.44 per inch

FDC 2614– 4075 Conform Series with RLA™

A standard weight high tack paper tape combined with a high tensile, elongation with tear resistant paper provides the sign maker and decal manufacture with the best possible combination of application tape and pre-spaced tape. Plus, the ability to store or roll finished graphics without the lifting or tunneling of tape from liner.

Length→	100 yds
Width↓	
Less then 48"	2.55 per inch
More then 48"	2.44 per inch

FDC 2616– 4775 Conform Series with RLA™

A premium grade high tack heavyweight saturated paper with elongation, resistance to abrasion and moisture, with greater conformability to facilitate placement and transfer of small and large graphics.

Length→	100 yds
Width↓	
Less then 48"	3.42 per inch
More then 48"	3.17 per inch

FDC 2602– 4000 Low-Tack

Length→	100 yds
Width↓	
48"	119.50
30"	79.06
24"	59.75
18"	47.43

FDC series 2602 is a R-Tape 4000 Low-Tack Application Tape – This product is a standard weight medium-tack paper designed specifically for pre-mask and transfer applications, and metal protection. This tape can be used in a variety of pre-mask and application tape functions including, but not limited to, automotive pin striping of single and multiple decorative stripes.

Application Tape

FDC 7400– R-Tape Digimask with RLA

Length→	100 yds
Width↓	
60"	160.45
54"	144.41
48"	128.36
38"	101.63
30"	80.23

FDC series 7400 is a R-Tape Brand Standard DigiMask™ With RLA Tape -This ultra low-tack on a standard paper is a surface protection products can be removed from graphics easily.

This easy-removal characteristic reduces the risk of pulling overlaminates away from prints or pulling the installed graphic from the application substrate, even when installing large format graphics with low initial tack or repositionable adhesives.

FDC 7041– R-Tape Digimask Plus with RLA

Length→	100 yds
Width↓	
60"	200.57
54"	180.52
48"	160.45
38"	127.03

FDC series 7401 is a R-Tape Brand DigiMask™ Plus Application Tape With RLA - The DigiMask™ Plus with a heavy-weight surface protection paper, is 30% thicker than the standard weight. The extra-thickness gives flimsy vinyl films extra body so graphics install easier and with fewer wrinkles and bubbles. During hot weather application, DigiMask™ Plus helps stabilize graphics panels, preventing stretching and distortion of the vinyl film during application.

FDC 7402– R-Tape Digimask Clear with RLA

Length→	100 yds
Width↓	
60"	186.17
54"	167.56
48"	148.93
38"	117.91

FDC series 7402 is a R-Tape Brand DigiMask Clear™ Application Tape With RLA - DigiMask Clear™ features a rigid polypropylene facstock, which resists stretching during graphics application to prevent misalignment of panels. The clear protective film allows inspection of prints and precise registration of graphic panels during installation.

VINYL Application Fluids

Accessories

Splash Application Fluid

Vinyl application fluids are designed to make the application of pressure sensitive vinyls and decals quick and easy by allowing you time to position your graphics and remove air bubbles prior to adhesion. The application fluid wets the surface, allowing you to slide the graphics until you get the exact placement. No need to worry about the adhesive sticking before you are ready. And application fluids are great when working with large graphics. Concentrated Splash is the most cost effective application fluid on the market.
